Fostering open source collaboration with technical writers

Visit https://g.co/seasonofdocs

Documentation is essential to the adoption of open source projects as well as to the success of their communities. Season of Docs brings technical writers and open source projects together to improve documentation, foster collaboration, and learn documentation best practices in the open source space.

During the program, open source organizations work closely with technical writers to create documentation projects and measure documentation impact. Technical writers learn open source practices and develop new skills.
